- Approved NIPRNET and SIPRNET
- Data rates from 2Mbps to 5Mbps
- Intelsat certified antennas
- Vehicle mounted systems available
- Peer-to-peer and peer-to-hub operation

OptiStreams is proud to introduce our new family of transportable, easy-to-deploy VSAT satellite systems. Our Transportable Series, with antenna sizes from 75cm to 2 meters, are designed for those who require on demand satellite connectivity in a reliable, transportable, and simple to setup package. This solution is easy to transport and does not require a technician. With a push of a button, the antenna automatically acquires, peaks, and cross-pols the satellite allowing for instant connectivity.

Built to military-grade specifications, the MSS series of products are perfect for not only military applications, but other government, institutional, and business uses as well.

This portable VSAT solution is ideal for companies working with:

- F Quick-deploy communications needs for disaster recovery
- F Emergency first responder situations
- F Remote file transfer
- F Voice-Over IP (VOIP)
- F Terrestrial network restoration
- Satellite News gathering

Systems start from \$36,987
